

Management of High Yielding Dairy Cows

Short description,
learning
outcomes

Do you enjoy learning about dairy production? Then this is the course for you.

In this course you will learn about the factors which play an important role in management of high yielding dairy cows in Denmark. The course will focus on themes of feeding, health, building design, reproduction and breeding in Denmark, a country known for its efficient dairy production. Each theme will consist of theoretical lectures and practical exercises on the school farm and local farms. The lectures and practical exercises will be delivered by teachers from Gråsten and experts from the different fields. Before the final project, you will go on practical training at local dairy farms to apply the knowledge gained on the course.

On completion of the course you will have gained the skills and knowledge preparing you for your future as a dairy farmer.

Duration

3 weeks

Institution

Gråsten Landbrugsskole, Fiskbækvej 15, 6300 Gråsten, DK. www.gk.dk

Prior knowledge

Basic knowledge in dairy production would be preferred.
