

***Interested in dairy cows and want to learn more about factors influencing animal health?***

In this course you will learn how to work with dairy cows focusing on their health and minimizing the need for antibiotics. You will learn about daily routines on a Dairy farm, including milking routines, hoof care, vaccination, wound management etc. You will also learn about antibiotic resistance, which is an increasing problem in Europe, and how to prevent this. Furthermore, you will learn about diseases and health problems among dairy cows, and some of the lessons will be held by a veterinarian working with cattle.

*You will learn by practical work in the school dairy farm, mixed with theoretical lessons the first two weeks. The third week, you will do 5 days of work practice at a Dairy farm.*
